

## Dynamic White CCT Controller Instruction

| Step                                                                                                                           | CCT (Kelvin) |  |
|--------------------------------------------------------------------------------------------------------------------------------|--------------|--|
| 1                                                                                                                              | 2700         |  |
| 2                                                                                                                              | 2900         |  |
| 3                                                                                                                              | 3200         |  |
| 4                                                                                                                              | 3600         |  |
| 5                                                                                                                              | 4000         |  |
| 6                                                                                                                              | 4400         |  |
| 7                                                                                                                              | 4800         |  |
| 8                                                                                                                              | 5200         |  |
| 9                                                                                                                              | 5700         |  |
| 10                                                                                                                             | 6500         |  |
| 11                                                                                                                             | All Off      |  |
| 1                                                                                                                              | 2700         |  |
| 2                                                                                                                              | 2900         |  |
| <b>1. Control by pressing button on the controller</b>                                                                         |              |  |
| <b>2. Change CCT from step 1 to 10 sequentially</b>                                                                            |              |  |
| <b>3. Step 11 : All Off</b>                                                                                                    |              |  |
| <b>4. Repeat from Step 1 to Step 10 sequentially after step 11.</b>                                                            |              |  |
| <b>5. Memorize previous CCT when powered off. But for memorize previous CCT, minimum 10 seconds are required for power On.</b> |              |  |
