FEELIS

LIGHT BOARD

Standard

Our edge-lit LED light boards offer a versatile way to add lighting source to any display, whether it be illuminating a printed image or adding eye-catching brilliance to object display. Feelis USA focuses on quality, and our light boards truly reflect our core value. Our Light Boards have US Patent for its smooth corner & cable protection.
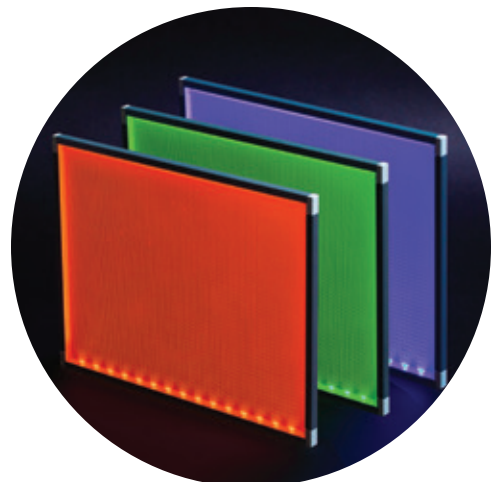

Dynamic White

Dynamic White System allows user to control the CCT (color temperature) of the LED light. You can adjust the CCT to set the tone of the display, from crisp, cool sharpness to a warm, glowing ambiance. CCT ranges from 2700K to 6500K.

RGB

Let these vibrant colors do the talking! RGB light boards are hard to miss when put on display in public areas. They are easy to operate, low-maintenance, and highly effective. RGB option is available for our Light Box products as well.

Standard

20mm, Snap-open, Single-sided

"Our standard light boxes feature our fine-quality LED light boards enclosed in flawlessly designed, 20mm-thick aluminum snap frame. Add an evenly-lit backlight source to any printed image to attract more attention for your products.
*Some standard-sized light boxes are stocked in our California warehouse. *"

Slim

16mm, Snap-open, Single-sided

Our slim light boxes feature our fine-quality LED light boards enclosed in flawlessly designed, 16mm-thick aluminum snap frame. Add an evenly-lit backlight source to any printed image to attract more attention for your products.
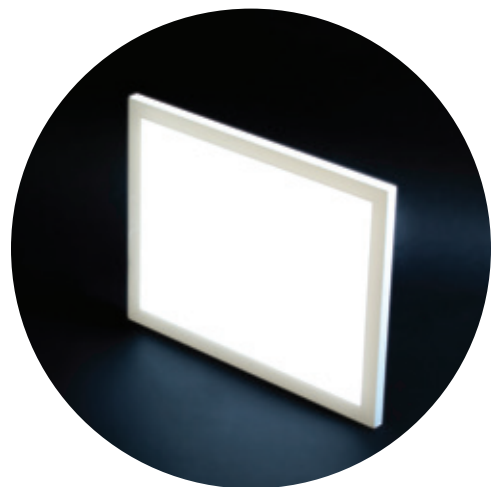

Ultra Slim

Snap-Open / Magnetic, Single-sided

Our ultra slim light boxes feature our fine-quality LED light boards enclosed in flawlessly designed, 10mm-thick aluminum snap frame. Add an evenly-lit backlight source to any printed image to attract more attention for your products. It is the world's thinnest light box!

LIGHT BOX

LIGHT BOX Fabric
25mm, Single-sided

Fabric light boxes are a perfect choice when you need to accentuate a subtle softness of an image. Simply print image on fabric and insert into the aluminum frame. The LED light board underneath the fabric will provide uniform brightness throughout the box.
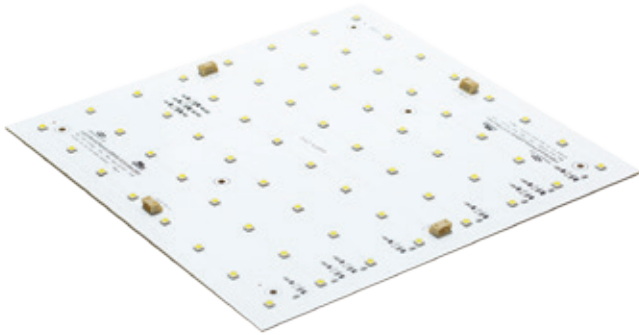

LIGHT BOX Double-sided
40mm, Snap-open, Double-sided

One light box with twice the advertising effect! Hang this Double-Sided LED Light Box in open areas for attention from both directions. Features the same high-quality Feelis LED Light Board for light uniformity.

LIGHT MODULE

BACKLIT Board

If you wish to build your own light box or simply replace fluorescent lights with LEDs, our backlit boards will provide illumination with proven longevity and uniformity. It is a perfect solution for large scale project with NO SIZE LIMITATIONS.

LED Strip

LED strips are the most versatile way of adding clean, bright light to any display. Use as many as you want, or as little as you want. Low power-consumption and no need for maintenance makes these strips a popular commodity. (These are rigid strips, not roll type)

Applications

Feelis USA is a world leader in manufacturing LED light boards and light boxes, with a well-established local presence as well.

Feelis USA was established in 2009 and has performed extremely well not only in sales volume but also customer satisfaction. Feelis USA provides both quality products from Korea and value added services that meet customer's needs, such as rapid response, technical support and tailor-made case by case consultation.
